Designed for long-term safe and reliable operation, the **Duecanali 5204 DSP+AESOP** suits both low impedance and constant voltage systems equally well.

A fully integrated state-of-the-art DSP yields extensive system management functionality. In addition to sound shaping and limiter functions in unique Powersoft style, the DSP hardware and Armonia Pro Audio Suite™ software enable compliance with IEC 60849 for the crucial requirements of sound systems for emergency purposes.

The AESOP interface provides two standard Ethernet ports and hub functionality for two AES3 digital audio streams equivalent to 4 analog signal channels over the same RJ45, allowing for a redundant ring architecture too.

Powersoft's legendary efficiency saves valuable energy, keeping both operational cost and 'carbon footprint' at a minimum: the **Duecanali 5204 DSP+AESOP** shines with outstandingly low power consumption and heat dissipation; this has direct positive effects on investment and recurring costs from the AC mains supply and air conditioning/cooling systems – not to mention the benefits to the environment for a more eco-friendly planet.
