

USB WL Adapter

Order # 728.799

DESCRIPTION

The Bluetooth® modules integrated in PCs and notebooks are all-round devices that do not meet all the functions that are required for operating a hands-free system or a headset in conjunction with a Unified Communications software solution. Therefore, the use of a USB WL adapter is recommended.

The USB WL adapter offers:

- High quality audio playback (A2DP)
- Synchronised volume level with the operating system (MacOS / Windows)
- Detection of the use of the microphone and switching to HFP
- The buttons of the Speakerphone work completely synchronised

The following Bluetooth® profiles are supported:

- **HFP** (wideband voice / HD audio (16kHz); AT commands from the hands-free channel are understood and converted into commands for the USB HID device.)
- **A2DP** (high quality audio playback; AVRCP for volume synchronisation; profile commands are converted into commands for the USB HID device.)

TECHNICAL SPECIFICATIONS

Frequency response 2,400 to 2,4835 GHz
Transmission power 2.5 mW (Class 2)
Length x width x height (mm) 31 x 17 x 6
Weight 3 g
